Moving Day

The Rayner family is moving to a new house. They have a dog, a cat and a pet mouse. The animals do not get along in the car, so they can take only one at a time.

Then there are other problems. They can't leave the dog alone with the cat, because the dog chases the cat if no one is watching. And they can't leave the cat and the mouse together, for obvious reasons!

How can the Rayner family get all three of their pets to their new house?
